EDUCATION

Syracuse University, New York, USA

Masters in Computer Science

CGPA: 3.6/4

Aug 2024 – May 2026

University of Mumbai, Mumbai, India

Bachelor of Engineering in Information Technology

CGPA: 9.3/10

Aug 2018 – Jul 2022

TECHNICAL SKILLS

Languages: C#, C, C++, Java, Python, Go, JavaScript, TypeScript, SQL, NoSQL (MongoDB)

Frameworks & Libraries: FastAPI, Django, Flask, Node.js, React, Angular, TensorFlow, PyTorch, Keras, scikit-learn

Cloud & DevOps: AWS (Certified), Azure; Kubernetes, Docker, Jenkins, GitHub Actions, CI/CD, Jira, Helm

Data, APIs & Storage: RESTful APIs, WebSockets, PostgreSQL, MySQL, MongoDB, Redis, Kafka, Vector DBs

AI / ML: RAG pipelines; LLM and agent orchestration; agent frameworks (LangChain, LangGraph); model fine-tuning; vector DBs (FAISS, Milvus); prompt engineering; OpenCV; YOLO; NLP toolkits; Pandas; NumPy; Matplotlib

WORK EXPERIENCE

Adobe - Digital Experience Platform

Software Developer Intern | AI Agent, MCP, LLM Orchestration, RAG

San Jose, CA, USA

May 2025 – Aug 2025

- Developed an AI agent using Model Context Protocol, connecting internal tools via a chat interface, reducing developer query resolution time by 50%.
- Introduced a supervisor-architecture-based multi-agent orchestration framework with 6 agents, minimizing model hallucinations.
- Pioneered a context-aware tool selection algorithm for 100+ integrated tools within a vector store, increasing tool selection accuracy.
- Designed an extensible agent manager enabling seamless integration of new MCP servers, expanding the tool-set and reducing on-boarding time for new tools.

Tata Consultancy Services Ltd. - Advance Drug Development Platform

ML Developer | Machine Learning, Design patterns, Computer Vision

Mumbai, India

Jun 2022 – Jul 2024

- Constructed Gen-AI pipeline for Medical Copilot using RAG technique, integrating Large Language Model using LangChain, automating 70% of tasks, reducing study building time by 80%.
- Streamlined Data Redaction in patient narrative documents with Azure ML, achieving 95% redaction accuracy and 90% reduction in manual tasks.
- Developed Image redaction service for patient biometric information (eyes & signature) in narrative documents using python OpenCV and CNN, with 92% accuracy.
- Created REST API backend to integrate the AI functionalities with the front-end, utilizing CI/CD workflows for deployment in cross-functional team.

PROJECTS

Kart.me - E-commerce platform | Django, Bootstrap, database modeling

Aug 2023 – Aug 2023

- Created a quick-setup e-commerce platform template for rapid development of new online stores.
- Key features include optimized user experience, security measures and documentation with ongoing support.

Online Project Exhibition Portal | Django, OAuth, AWS EC2, Version Control

Apr 2021 – May 2021

- Devised a platform for displaying projects of Final Year students at DBIT during the COVID times.
- This is a highly scalable platform with features like OAuth, Role Based Access and Voting System.

Smart Door lock System | Python, Computer Vision, NLP, Azure cloud, JSON

Jun 2020 – Aug 2020

- Built a smart door lock system with one-shot facial recognition using Siamese network, achieving a 90% accuracy.
- Integrated an NLP based chatbot within the system to provide real-time support and implemented OTP-based unlocking functionality for emergency scenarios, ensuring secure access and user safety in critical situations.

CERTIFICATIONS

• AWS Certified Solutions Architect - Associate

Jul 2025 – Jul 2028
