EDUCATION

Syracuse University, New York, USA

Masters in Computer Science

CGPA: NA

Aug 2024 – May 2026

University of Mumbai, Mumbai, India

Bachelor of Engineering in Information Technology

CGPA: 9.29/10

Aug 2018 – Jul 2022

WORK EXPERIENCE

Tata Consultancy Services Ltd. - Advance Drug Development Platform

Mumbai, India

Product Engineer | Machine Learning, System design, Design patterns

Jan 2023 – Jul 2024

- Constructed Gen-AI pipeline for Medical Copilot using RAG technique, integrating Large Language Model using LangChain, automating 70% of tasks, reducing study building time by 80%.
- Streamlined Data Redaction in patient narrative documents with Azure ML, achieving 95% redaction accuracy and 90% reduction in manual tasks.
- Developed Image redaction service for patient bio-metric information (eyes & signature) in narrative documents using python Open-CV and CNN, with 92% accuracy.

System Engineer | REST API, Agile, Software Development Life Cycle

Jun 2022 – Dec 2022

- Engineered extractive summarizing service using transformer model to compress protocol documents by 80%, retaining 94% accuracy of medical data.
- Created REST API back-end to integrate the AI functionalities with the front-end, utilizing CI/CD workflows for deployment in cross-functional team.

Change is Us

Mumbai, India

Web Developer Intern | Web Automation, Web Scraping, Optimization

Feb 2022 – Mar 2022

- Contributed to building organization's website JS powered by JAM Stack architecture and open-source CMS, cutting load time to 2 seconds.
- Automated blog rendering from external source to website using web scraping and Selenium, reducing manual effort by 90% and ensuring daily updates with GitHub Actions.
- Facilitated online registration process for beach cleaning drive, increasing the participation and reach by 60%.

PROJECTS

Inventory management System | Python, Scripting, Process Scheduling, Git

Mar 2022 – Aug 2022

- Deployed a system to extract and store hardware details using scripting in Smart India Hackathon (SIH 2022).
- Delivered a platform for real-time monitoring and analytics of a inventory status in a corporate.

Fast Tolling System | Java Spring boot, MongoDB, Deep Learning, GCP

Nov 2021 – Jan 2022

- Built a Tolling software deploying microservice architecture in a hackathon, utilizing Computer Vision with Yolo-v4 tiny and DeepSort algorithm for vehicle tracking, saving 90% time than RFID-based FastTag system.

Smart Door lock System | Django, Computer Vision, NLP, Azure cloud

Jun 2020 – Aug 2020

- Developed a smart door lock system with one-shot facial recognition technology using a Siamese network, achieving a 90% accuracy rate and effectively mitigating false positive identifications.

HONORS AND AWARDS

- Achieved 1st position among the top 15 teams in the Finals of the Smart India Hackathon 2022, a national-level hackathon organized by the Government of India, with over 15,000+ student participants.
- Acknowledged among the top 8 finalist out of 1000+ participants in Deep Blue Hackathon 2021, organized by Mastek.
- Awarded with TCS Contextual Masters for notable contributions and achievements.

TECHNICAL SKILLS

Languages: C, C++, Java, Python, HTML/CSS, JavaScript, Typescript, SQL, NoSQL (MongoDB), GraphQL

Frameworks: Django, Django Rest Framework, Flask, Node.js, React, Angular

Developer Tools: Git, GitHub, Kubernetes, Docker, Google Cloud Platform, VS Code, Selenium

Libraries: TensorFlow, Keras, MXNet, PyTorch, Pandas, NumPy, Matplotlib
